Experience

UX/UI Designer – Ncash.ai
July 2023 – Present

- ✦ Created a design system for design consistency and to make design and development cycle faster.
- ✦ Redesigned the mobile application
- ✦ Built website using Framer and worked on Locofy for exporting code from design to reduce development time.
- ✦ Drove design decisions through user feedbacks and event analytics

Freelance UI Designer – J&JP
Aug 2020 – Feb 2021

- ✦ Designed interfaces for personalized inventory management web application for a cloth manufacturing company.
- ✦ Streamlined the client's inventory management process by transitioning them from manual Excel sheets to an efficient web application, resulting in significant time savings and increased productivity.

Product Designer – Teamlyst
Aug 2020 – Feb 2021

- ✦ Designed a team building platform for students in my college to find teammates to work on their project and conducted research and made prototypes for the web application.
- ✦ Onboarded 90+ users into the platform and many users formed team.
